Prepared By	Kryzotech
Proposal Date	15 June, 2026
Project Type	Single Vendor E-Commerce Website

Important Cost Note

Domain, hosting/server, SSL certificate if separately required, Malaysian payment gateway fees, transaction charges, paid APIs and third-party service costs will be paid by the client directly.

Proposal Details

Complete scope, features, responsibilities, cost, timeline and delivery plan

1. Project Overview

We are pleased to submit this proposal for developing a professional single vendor e-commerce website for your business in Malaysia. The website will allow your business to showcase products, manage orders, receive online payments, and operate through a secure admin dashboard.

The website will be developed using modern technologies such as Next.js for the frontend and Express.js / Node.js for the backend, ensuring fast performance, scalability, clean structure and a professional user experience.

2. Project Objective

The main objective of this project is to create a complete e-commerce platform where customers can browse products, add items to cart, place orders, and make payments through a Malaysian payment gateway selected by the client.

The website will also include a powerful dashboard so the business owner can manage products, orders, customers, payments and website content easily.

3. Proposed Technology Stack

Area	Technology / Scope
Frontend	Next.js
Backend	Express.js with Node.js
Database	MongoDB or PostgreSQL, based on project need
Admin Dashboard	Custom dashboard for product, order and customer management
Payment Gateway	Client-selected Malaysian payment gateway
Hosting	Client's preferred hosting/server
Design	Responsive, mobile-friendly and SEO-friendly structure

4. Main Website Features

Customer Website Features

Professional homepage design	Product listing page
Product details page	Product categories
Product search and filter option	Add to cart functionality
Checkout page	Customer registration and login
Customer order placement	Payment gateway integration
Order confirmation system	Mobile responsive design
Contact page	About page
Terms and conditions page	Privacy policy page
Basic SEO-friendly structure	Fast loading and clean user interface

5. Admin Dashboard Features

Dashboard Management Features

Secure admin login	Product add, edit and delete option
Product image upload	Category management
Order management	Customer information view
Payment status view	Order status update
Sales overview	Website content management
Basic analytics overview	Admin profile and settings section

6. Payment Gateway Integration

We will integrate a Malaysian payment gateway based on the provider selected by the client. The payment gateway may support online banking, card payment, e-wallet or other available Malaysian payment methods depending on the provider.

The client will provide the payment gateway account, API credentials, business verification details and any required payment gateway documents.

Payment Gateway Cost Responsibility

Payment gateway setup cost, transaction charges, annual charges or any third-party payment service fees will be paid by the client directly.

7. Free Business Portfolio

As an additional value, we will create a Business Portfolio section or website for free. This portfolio will help the client professionally present the business, services, brand information, company profile, contact details and business credibility.

Free Portfolio Includes

Business introduction	Company profile
Services section	Brand story
Contact information	Business image/content section
Professional responsive layout	

8. Project Cost

Item	Amount / Note
Single Vendor E-Commerce Website Development	BDT 25,000 Only
Admin Dashboard	BDT 15,000 Only
Business Portfolio	Free of cost
Hosting, Domain and Payment Gateway Charges	Paid by the client directly

This price includes website development, admin dashboard development, frontend and backend setup, basic testing, and payment gateway integration support.

9. Costs Not Included

- Domain cost
- Hosting/server cost
- SSL certificate cost, if required separately
- Payment gateway setup fee
- Payment gateway transaction charges
- Any paid plugin, paid API or third-party service cost
- Additional features outside the agreed scope

10. Project Timeline

Estimated project completion time: 3 to 5 weeks. The timeline may vary depending on content availability, payment gateway approval, client feedback and any additional feature requests.

Phase	Work Details
Phase 1	Requirement finalization, UI planning and project setup
Phase 2	Frontend website pages and responsive design
Phase 3	Backend API, database setup and admin dashboard
Phase 4	Cart, checkout, order system and payment gateway integration
Phase 5	Testing, deployment support and final delivery

11. Client Responsibilities

Information / Access Required from Client

Business logo	Product information
Product images	Product prices
Business details	Payment gateway account/API access
Domain and hosting access	Website content such as About, Contact, Terms and Privacy Policy
Feedback during development	

12. Our Responsibilities

Development Team Responsibilities

Full e-commerce website development	Admin dashboard development
Frontend and backend development	Database setup
Payment gateway integration support	Mobile responsive design
Basic testing before delivery	Deployment support on client's hosting
Free business portfolio section/website	Basic guidance after delivery

13. Revision and Support

We will provide reasonable revisions during the development process based on the agreed project scope.

After project delivery, we will provide basic support for fixing development-related issues for a short support period. Any new feature, major redesign or extra functionality will be considered additional work.

14. Final Delivery

Deliverables

Fully functional e-commerce website	Admin dashboard
Source code	Database setup
Payment gateway integration	Deployment support
Free business portfolio	Basic usage guidance

15. Conclusion

We are confident that we can deliver a professional, secure and user-friendly single vendor e-commerce website for your business in Malaysia. Our goal is to build a system that helps your business sell products online, manage orders easily and grow with a strong digital presence.

We look forward to working with you on this project.
